📍 Albuquerque, NM

🏠 Remote Work Preferred

Work Experience

Full-Stack/Automation Developer

Sept. 2021 – Present

DPR Construction 📍 *Fully Remote*

- Maintain Python FastAPI codebase, developing APIs, being Azure Function App admin, and writing tests
- On frontend development team for React apps, designing reusable components and custom webhooks
- Update and add endpoints to C# backend APIs, handling authentication, objects, and complex SQL queries
- Serve as UiPath Orchestrator Admin and RPA developer in UiPath, Microsoft Power Automate, and Python
- Apply DevOps best practices for documentation, source control, pipelines, and process tracking in Azure
- Lead transition team that moved all endpoints to Azure API Management, utilizing infrastructure as code

One-Man Dev Team

Sept. 2020 – Sept. 2021

Lanehart Electrical Contractors 📍 *Dallas, TX*

- Wrote custom VBA and Python tools for reading and updating Excel construction bids with \$0 budget
- Analyzed and generated reports on decades of unsorted and unmaintained Excel based documents
- Designed and implemented a new contractor form to be linked directly to bids, eliminating manual entry

RPA Developer Intern

May 2019 – Aug. 2019

American Fidelity Assurance Company 📍 *Oklahoma City, OK*

Other Projects

Personal Projects

Always Ongoing

- Play with self-hosted tools to do cool stuff like home automation and hosting websites and game servers
- Run custom and local DNS servers, VPNs, and backups using Proxmox LXC/VMs and Docker containers
- Use ChatGPT or local LLMs to build simple scripts and tools that either entertain me or make my life easier

Software Engineering Capstone - Project Lead

Aug. 2019 – May 2020

PCI Energy Solutions 📍 *Norman, OK*

- Created LAMP-stack web-dashboard to track software installation status across the country, hosted on AWS

RoboMagellan and IGVC Competition

Aug. 2018 – March 2020

Sooner Competitive Robotics Team 📍 *University of Oklahoma*

- Developed a ROS architecture to achieve teleoperation and autonomous navigation using a TurtleBot2
- Implemented a distributed system with Linux, Arduino, and Raspberry Pi components intercommunicating

Education

B.S. Computer Science w/ Minor in Mathematics

Aug. 2016 – May 2020

University of Oklahoma 📍 *Norman, OK*

- GPA: 3.7/4.0
- 🏆 National Merit Scholar
- Honors College Student
- Alpha Epsilon Pi President

Skills
